

Advanced Dental Technology in a Relaxed Environment.

This dental office seems almost spa like. Each dental suite has a gorgeous garden view through floor to ceiling glass featuring wildlife, a double trunk intertwined Japanese red maple, a rare tulip tree plus some of the tallest evergreens in the city.

Complementing the serene beauty outside is a modern, inviting patient reception area, including digital educational games for children, complimentary organic coffee with spacious, comfortable seating.

“We always try to educate our patients to make good knowledge based decisions.”

Dr. Hoediono

Dr. de Man & Dr. Hoediono Dentistry caters to time stressed families needing early morning, evening and Saturday appointments. They provide appointment text reminders, free Wi-Fi, document printing, and the convenience of insurance

direct billing. “Kids can come in on Saturday and still do their after school activities,” says Dr. Harry Hoediono who together with wife and business partner Dr. Helen de Man have owned the practice for 25 years.

As well as general dentistry, each dentist has particular areas of talent. Dr. Hoediono is expert with complex bite reconstruction. He is a passionate dental professional, teacher and served as a director and President of the Ontario Dental Association.

Dr. de Man is renowned for her cosmetic work. In addition, she is a clinical instructor at the University of Toronto Faculty of Dentistry, so she is current with the latest technology. Dr. de Man recently introduced a new CAD/CAM system and lab which reduces cap and crown procedures from two weeks to a single day.

As a clinical instructor, Dr. de Man had another advantage. She was able to identify a top student to be their associate dentist. Dr. Tim Shigapov, originally from Russia is exceptional with oral surgery and root canal therapy. “He was the best, top of his class. He has a really nice way with people and technically he is just superb,” declares Dr. Hoediono.

Whether it's crowns, veneers, whitening yellow teeth or fixing a crooked smile with invisible, removable aligners; de Man & Hoediono have a wide variety of cosmetic options, both reversible and permanent.

“We love working with kids,” says Dr. Shigapov. The dentists, hygienists and staff are adept at dealing with children, particularly those who struggle with a dental visit. The offices are fully wheelchair accessible with ample parking and arrangements can be made for patients in need of

transportation. The dentists take a consultative, educational approach and encourage family members to participate in the patient's treatment options.

The technology at de Man & Hoediono Dentistry empowers the educational process. Intra oral cameras allow the patient to see everything before, during and after the work. Their website has detailed videos of virtually every treatment. For patient and staff safety, digital X-rays are employed to reduce exposure to radiation.

Skilled dental professionals, state of the art technology, a wide range of cosmetic choices, extended hours and good patient communication are hallmarks of de Man & Hoediono Dentistry. “We always try to educate our patients to make good knowledge based decisions. I think that's more important now,” concludes Dr. Hoediono. •
